DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 11, 21, 31 and 41-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thornton et al (US 6015431). Thornton et al discloses an endoprosthesis assembly comprising an implantable endoprosthesis in the form of a self-expanding stent (col 9, l 61), a generally tubular delicate constraining sheath made of ePTFE (col 12, l 4-6) with means for disruption (132) initiated by the application of a distending force. However, Thornton et al does not disclose using a packaging sheath. It is common knowledge in the prior art to package equipment in the art of surgical instruments for the purpose of keeping the equipment clean and sterile prior to use. It would have been obvious to one of ordinary skill in the art at the time the invention was made to package the endoprosthesis assembly of Thornton et al in order to keep it clean and sterile prior to use.

With regards to claims 41 and 42, the method limitation of storing at a temperature of less than 5 degrees C for 30 or 60 days imparts no structural limitation on the product of an endoprosthesis assembly, so the endoprosthesis assembly of Thornton et al structurally meets these claims.

Response to Arguments

Applicant's arguments, see pages 11-12, filed 11/19/03, with respect to claims 2-10, 12-20, 22-30, and 32-40 have been fully considered and are persuasive. The 35 USC § 103 of claims 2-10, 12-20, 22-30, and 32-40 has been withdrawn. Claims 2-10, 12-20, 22-30, and 32-40 establish a structural degree of delicateness of the constraining sheath not disclosed or rendered obvious by the prior art of record. Claims 1, 11, 21, 31 and 41-42 remain rejected under the original rejection, since these claims do not establish a degree of delicateness beyond the scope of the prior art of Thornton et al.

Allowable Subject Matter

Claims 2-10, 12-20, 22-30, and 32-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3738

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
